

Kratin

Towards Intelligent Continuous Care

Real time care experience powered by Kratin's UHX platform

Transition towards value based offering

Transitioning Care Model

Changing Paradigms of Care

Episodic Care	→ Continuous Care
Reactive	→ Proactive
Illness	→ Wellness
Treatment	→ Health Promotion
Rear View	→ Predictive
Physician centric	→ Patient centric
Silo Care	→ Integrated Care

Outcomes

Reduced Cost of Care

Improved Access to Care

Engaged Patient & Provider

Digital care solutions play a vital role in changing paradigm of care by assisting patients in their well being as virtual companion.

Intelligent Continuous Care with TruliaCare Suite

Quick Enrollment

Integrates with your existing infrastructure enabling single login credentials and efficient user management

Continuous Monitoring

Monitors health state via wearables, apps and automatically notifies care team if any vitals cross threshold

Digital Care Interventions

Clinicians can intervene with personalized educational content, care assessments and HIPAA compliant Video calling

Improved Outcomes

Engaged patient and care team members for improved care delivery, reduced cost and better team efficiency

Care Regime Adherence

Reminders and contextual assistance for prescribed care regime activities like medications, exercises etc.

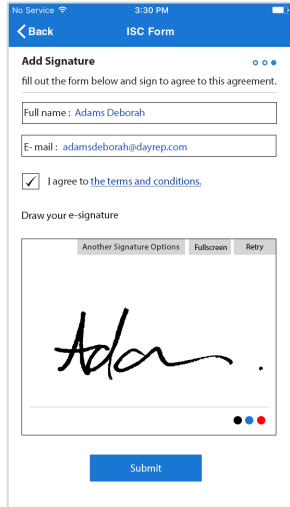

Holistic View

Provides a unified view with clinical and patient generated information to Clinicians enabling better care decisions

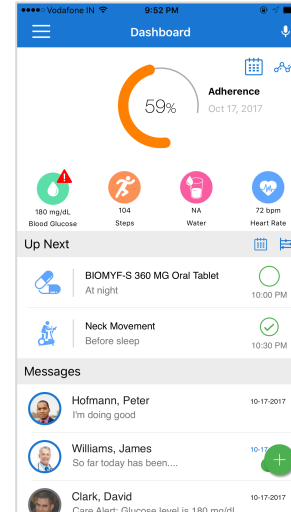

Secure Collaboration

Enables real time clinical workflows and communication over HIPAA compliant secure messaging solution

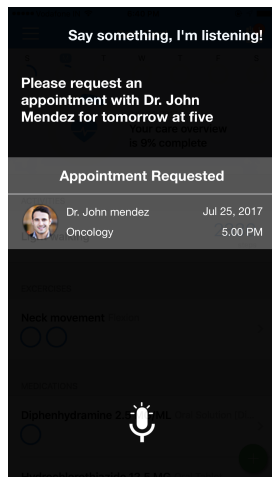

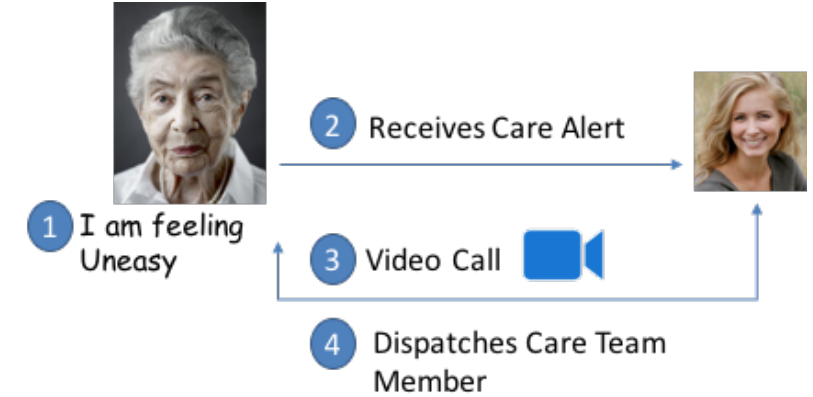

Care Companion – Patient's Visual Journey

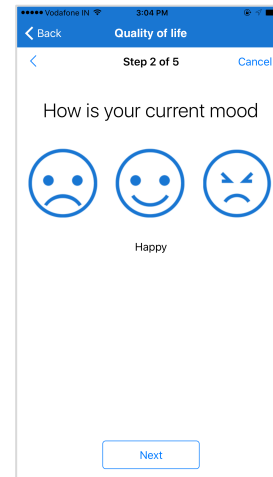

"I was able to get started quickly within minutes without any hassles."

"App reminds me about medicine that I need to take. If I miss my medication, then it alerts my care team member & son"

"I can simply speak to get things done like requesting an appointment."

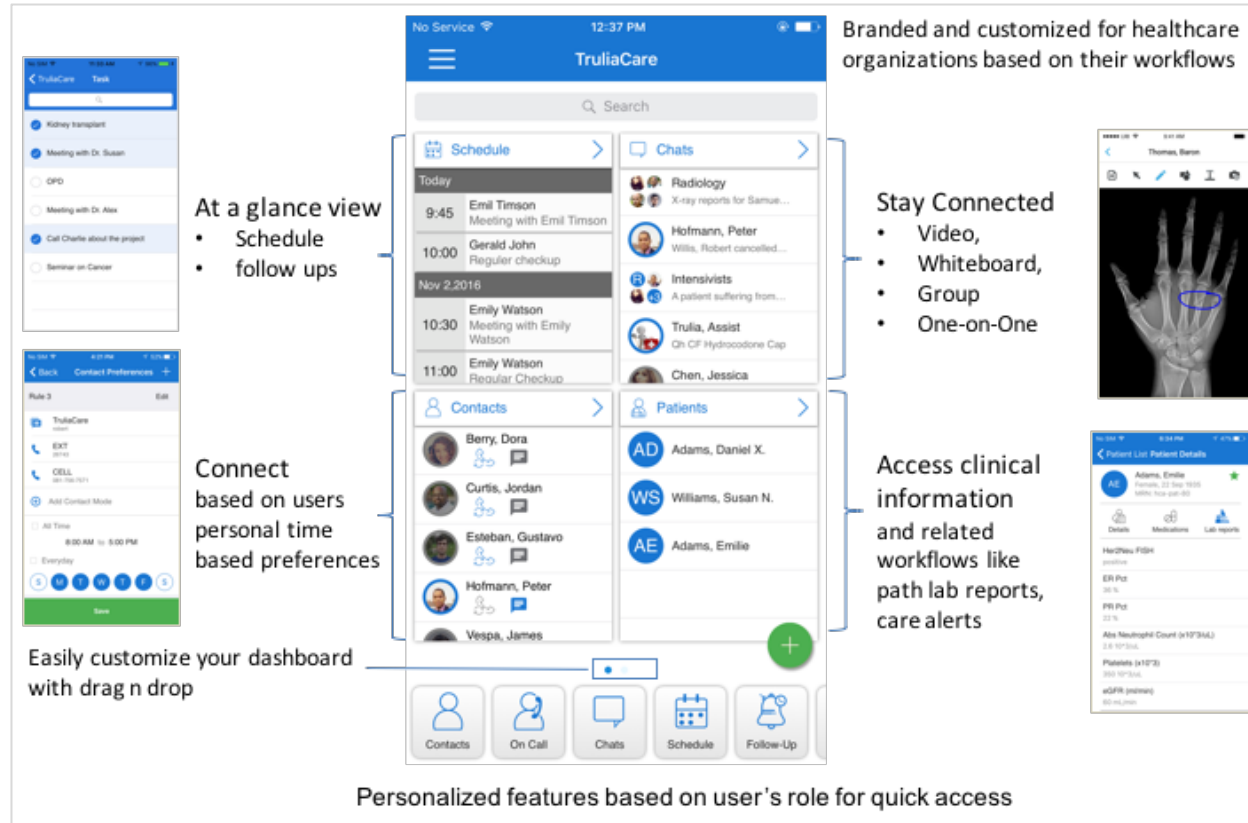

"My care team can send me articles, assessments and other digital content including recommended applications that are relevant for me."

"I can reach out to my care team member anytime via message, voice or video call"

Care Assistant – Clinician's Visual Journey

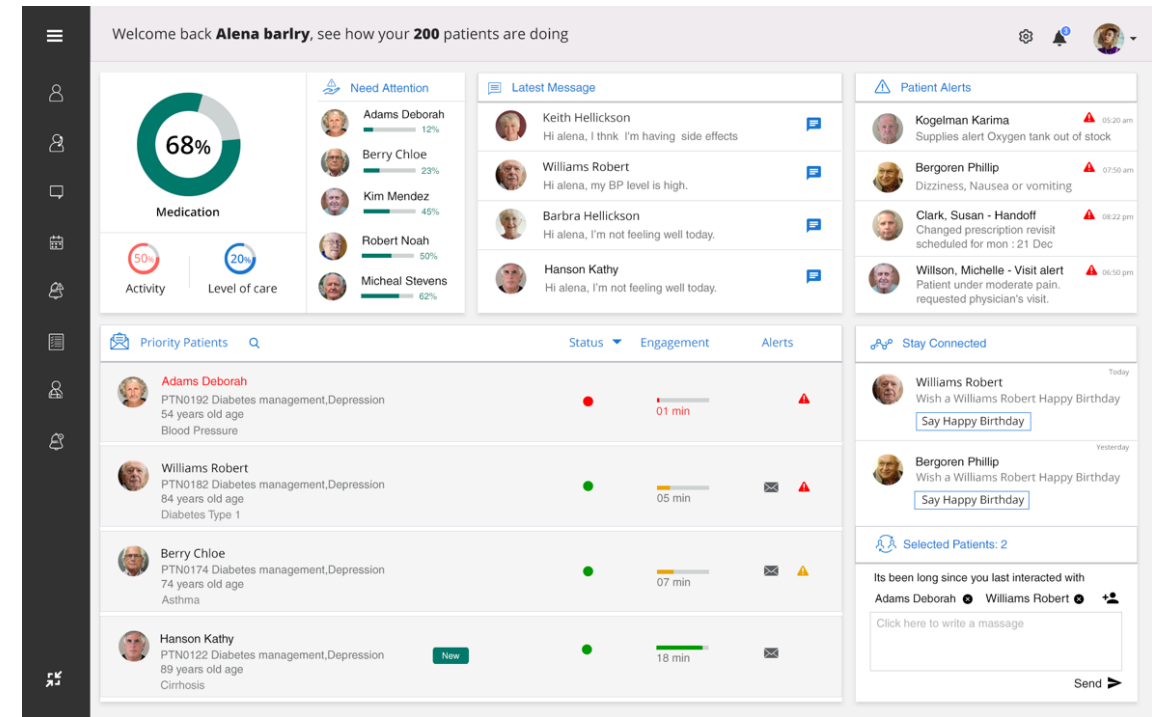

"My one stop solution for taking care of patients and staying in touch with colleagues without any hassles."

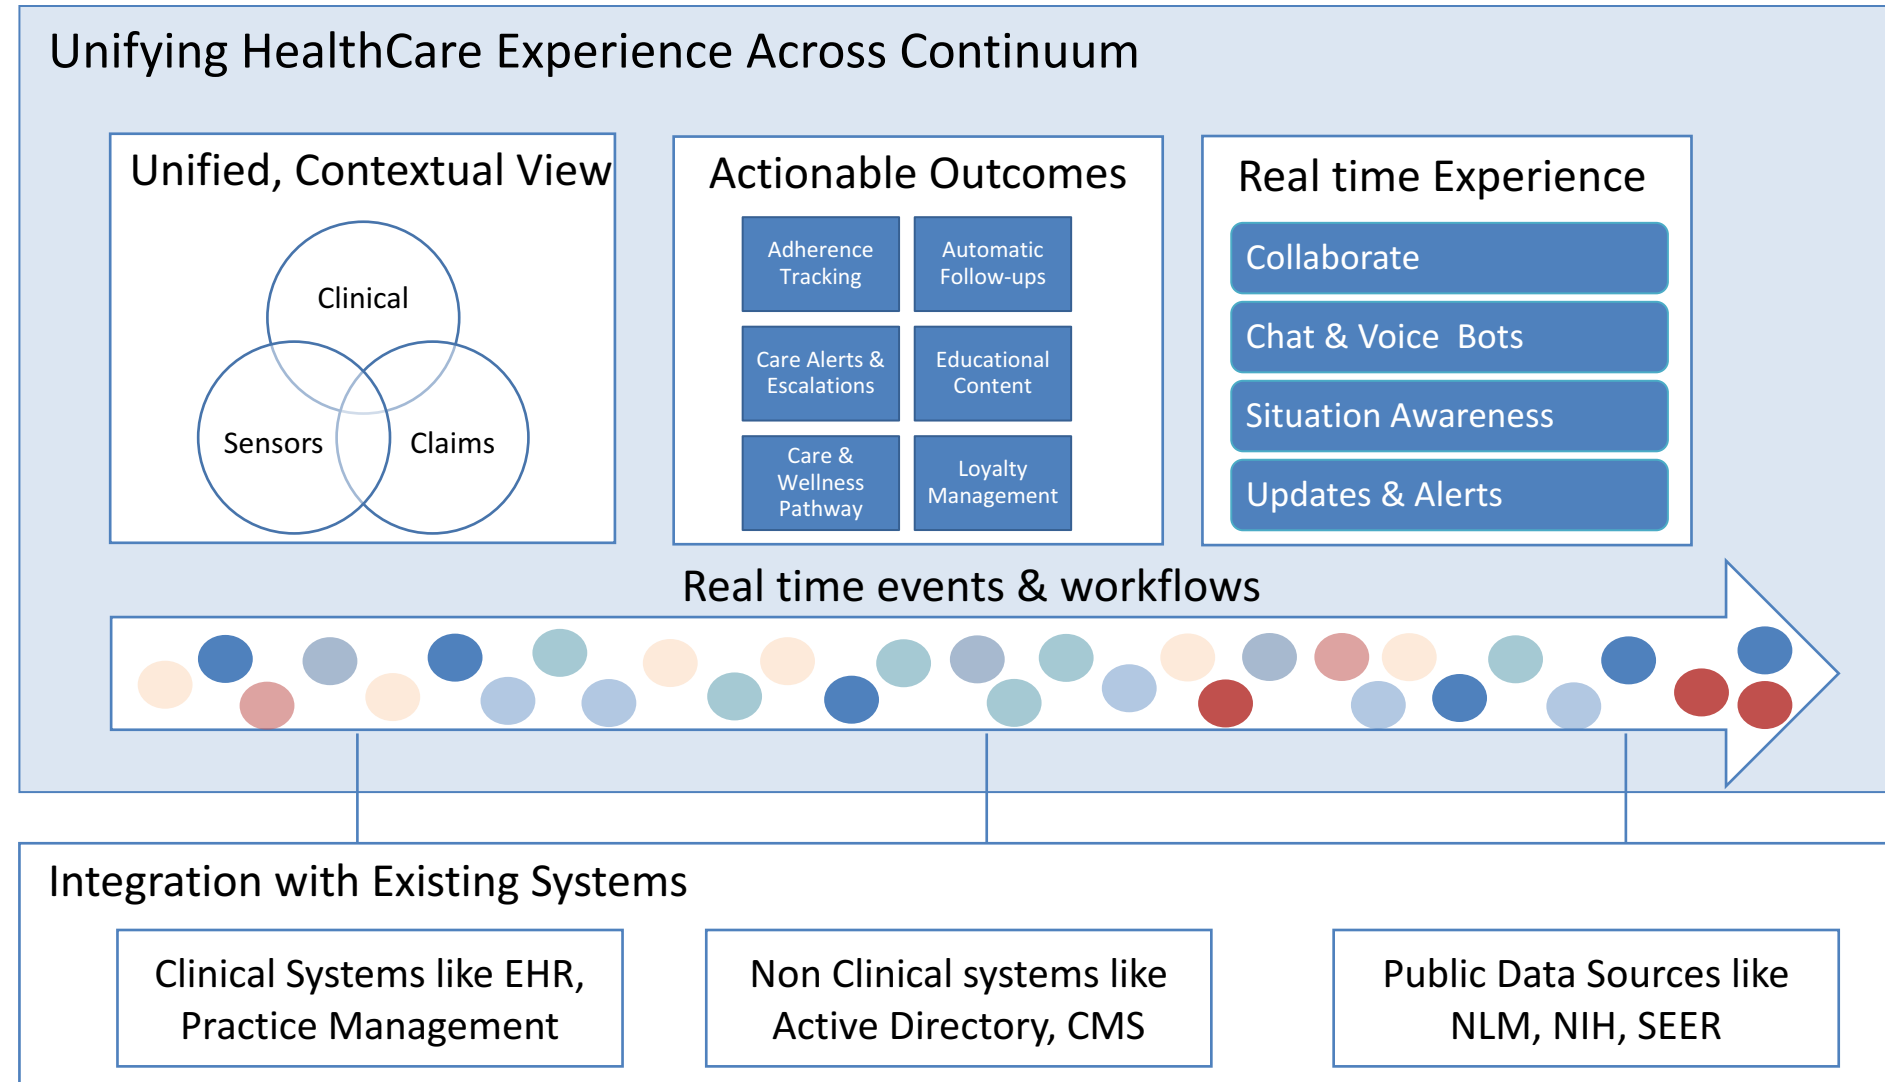

- Care Provider

"I can manage care for multiple patients with a unified dashboard that integrates with existing systems."

- Care Coordinator
